

WAFERS SUPPLIER

LANXIN Is One-Stop Micro-Nano Fabrication & Thin-Film Solutions Provider

Providing high-quality coated semiconductor wafers and substrate materials for research institutes, universities, and semiconductor enterprises,

Provide professional technical guidance in the research and industry of micro nano technology applications, helping users accurately identify ideal wafers

We can quickly supply from a large inventory to meet its application requirements. You can purchase it online through our wafer store. Lanxin Company is committed to supplying semiconductor coated wafers and materials worldwide, with the goal of exceeding customer expectations and becoming a top tier semiconductor service provider
